Romania

About Us

RigZen Group is a Romania-based provider of Rope Access & Industrial Services, built on international expertise and strict adherence to safety, regulatory compliance, and operational precision.

We deliver certified access, installation, and maintenance solutions for industrial facilities — reliably, safely, and with minimal operational disruption.

Our Mission & Vision

To provide safe, efficient, & high-quality Rope Access & solutions that support our clients' success, contribute to society, & promote environmentally responsible practices.

To be Romania's most trusted partner, known for safety excellence, long-term relationships, & innovative solutions — while making a positive impact on society & advancing sustainable industrial practices.

Overview

Trusted Partner in Industrial Services

- Delivering high-precision technical solutions that enhance asset uptime, optimize lifecycle costs, and align with sustainable operational goals.
- Our expertise in IRATA-certified Rope Access is integrated with advanced capabilities in installation, inspection, and maintenance across complex industrial environments.
- We operate with a strict safety-first protocol, full regulatory compliance, and minimal disruption to ongoing operations, ensuring continuous productivity for our industrial partners.

Solutions Beyond Reach

RigZen Group provides a scalable, cost-efficient alternative to scaffolding & aerial platforms by integrating advanced Rope Access techniques with comprehensive industrial service capabilities.

Our offerings include structural & mechanical installations, protective coatings, precision painting, technical maintenance, repair, & inspection — all executed under strict HSE protocols & with minimal operational impact.

From vertical structures to complex industrial facilities, our certified teams ensure rapid deployment, high-accuracy execution, & environmentally responsible operations.

This method enables clients to reduce downtime, control maintenance costs, & maintain critical system integrity, even in high-risk or limited-access environments.

Core Values

Safety First

We operate with a zero-compromise safety culture — for our team, our clients, & the environment.

Ethics & Transparency

We build trust through honesty, accountability, & respect.

Technical Excellence

We work with certified professionals & proven methods to ensure every job meets the highest standards.

Client Partnership

We treat every project as a long-term relationship, not a one-time task.

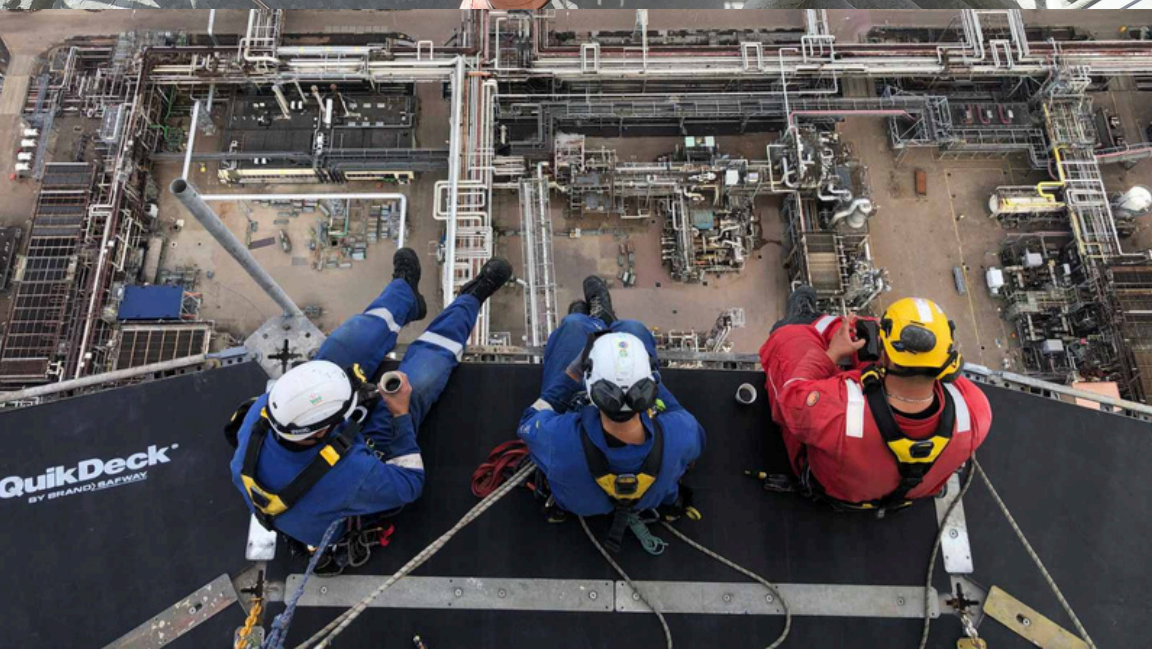

RigZen Group delivers a comprehensive suite of specialized services tailored for industrial facilities, with a focus on safe, precise, & efficient execution in complex & high-access operational environments.

Our Services

Installation & Erection Services	Painting & Protective Coatings	Cleaning Services	Demolition Services	Confined Space Services	Stand-by Rescue Services
<p>Certified execution of structural & mechanical installations for industrial assets.</p> <p>We perform high-access & confined-space installations with precision, safety compliance, & operational efficiency.</p>	<p>Industrial-grade surface protection for structural steel, tanks, pipelines, & facility components.</p> <p>Our certified applicators deliver corrosion-resistant coatings & finishing systems that ensure long-term durability & compliance with industry standards.</p>	<p>Full-spectrum cleaning solutions for heavy-contaminant environments, confined spaces, & vertical or complex-access structures.</p>	<p>Controlled industrial dismantling with a focus on safety, structural integrity, & environmental compliance.</p>	<p>With experience across more than 20 confined space projects, our technicians follow strict IRATA & HSE protocols, ensuring full compliance, hazard mitigation, & operational safety in every task.</p>	<p>We provide dedicated, on-site rescue teams for high-risk operations such as confined space entry, working at height, & hazardous tasks.</p> <p>Trained to IRATA standards, our professionals ensure safety compliance & are fully prepared to act immediately in case of an incident.</p>

1 Installation & Erection Services

➤ Our teams ensure secure, compliant assembly even in high-access or complex environments, supporting long-term asset integrity and operational safety.

- Mounting and securing HVAC ducts or ventilation systems
- Fixing and aligning pipework on vertical or overhead surfaces
- Installing metal structures (beams, platforms, brackets) at height
- Suspended equipment installation (lights, sensors, cameras, signs)
- Assembly of façade support systems or cladding brackets
- Bolting and fastening structural components
- Installation of access systems (ladders, handrails, lifelines)
- Mounting of insulation panels or fireproofing wraps
- Installing protective netting or barriers
- Deployment of fall arrest or safety systems on industrial sites
- Installing metal structures

➤ Suspended Access System Services

- Installation of temporary suspended platforms (e.g., QuikDeck, swing stages)
- Installation of lifelines and anchor points for suspended work
- Rope access integration with suspended platforms
- Suspended scaffolding for offshore, industrial, and confined environments.

Painting & Protective Coating

➤ Anti-corrosion

- Preparation of work processes
- Paint supply
- Surface Preparation
- Structure maintenance
- Product application
- Quality assurance & quality control
- Planning maintenance during warranty periods

➤ Painting Services

- Paint application
- Maintenance coatings
- Thermo-insulating coatings
- Hydro-insulating coatings
- Thermo-resistant coatings

➤ Blasting & Hydro-Blasting

- Dry abrasive blasting
- Wet abrasive blasting
- Chemical paint stripping
- Oil & grease removal
- Dust removal
- Low & high-pressure water cleaning
- Stainless steel passivation

Cleanin Services

We provide specialized rope access cleaning & maintenance services for a wide range of industrial environments:

- Chimney, smokestack, & flue cleaning for safe exhaust flow & compliance
- Dust removal from beams, ceilings, & overhead structures
- Certified cleaning of tanks & confined spaces
- Vertical & hard-to-access pipeline & duct cleaning
- Elevated structural steel cleaning for corrosion control
- HVAC & exhaust system cleaning, including fan & coil units
- Exterior cleaning of offshore, power plant, & energy assets

Silo Cleaning & Maintenance

We service a wide range of silo types — including cement, grain, feed, ash, & chemical silos — delivering:

- Internal cleaning & buildup removal
- Mechanical maintenance, including gate repairs, seal replacement, & chute servicing
- Filter replacement & maintenance of ventilation systems
- Inspection & minor structural repairs as needed to ensure operational reliability & safety compliance

Demolition Services

Every project is managed with a strong focus on safety, dust control, & minimal disruption to surrounding operations, making RigZen a trusted partner for both partial & full-scale demolition works.

RigZen Group delivers safe, efficient, & controlled demolition solutions tailored for commercial & structural environments. Our certified technicians are trained in advanced techniques, including high-access dismantling & confined space deconstruction, ensuring precision in even the most complex & restricted environments.

We specialize in:

- High-access demolition using rope access & suspended platforms.
- Selective structural dismantling & interior strip-out services.
- Façade & cladding removal at height.
- Demolition & removal of steel structures & industrial equipment.
- Confined space demolition inside tanks, ducts, & shafts.

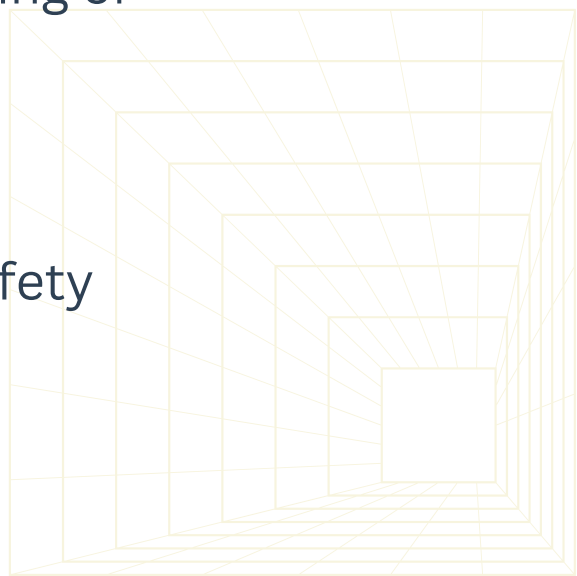

Every project is executed with a strict commitment to health, safety, & environmental standards—even in the most complex & hazardous environments.

Confined Space Services

RigZen Group specializes in confined space operations, providing fully certified teams, equipment, & procedures to ensure maximum safety, compliance, & efficiency in high-risk environments. Our technicians are trained to operate in both horizontal & vertical confined spaces, delivering solutions for inspection, cleaning, installation, & emergency response.

- Safe entry & work inside tanks, pipes, ducts, & chimneys
- Confined space inspections using rope access methods
- Cleaning, debris removal, & specialized coating or welding
- Gas detection, atmospheric monitoring, & ventilation systems
- Permit-to-work compliance & continuous safety supervision

Stand-by Rescue Services

Our standby rescue teams are **trained, equipped, & ready** to respond to emergencies in high-risk work environments such as confined spaces, working at height, or hazardous operations. We ensure compliance, safety, & fast response when it matters most, operating under **IRATA** standards to guarantee the highest level of technical proficiency & procedural safety in rope access & rescue operations.

- Confined Space Rescue Coverage
- Working at Height Rescue Support
- Emergency Response Planning & Execution
- Technical Rope Rescue Operations
- Equipment Provision & Setup
- Compliance with Local & International Safety Standards
- Integration with Client's Safety Team

Experience & Partnership

Our key specialists, including supervisors & administrators, bring international experience from complex industrial projects across Europe & the Middle East.

- Ciment Qatrana – Jordan
- Al Rajhi Cement – Jordan
- Ciment Manaseer – Jordan
- Northern Cement – Jordan
- Taj Mall - Jordan
- Abdali Mall – Jordan
- Arab Potash – Jordan
- CIMEX – Egypt
- Centrala PGE – Poland
- Centrala electrica Kozienice – Poland
- PGNIG CA Termika – Poland
- Elektrownia Opole – Poland
- Centrala electrica Elektranai – Lethuania
- Centrala electrica Velnus – Lethuania
- Lafarge – Moldova
- UNESCO (Petra) - Jordan
- Skyproof - Estonia
- Fender (Uniper Power Plant, Exxon Mobil, Shell Facilities, DOW Factory) - Netherlands

Our Partners

We build partnerships that go beyond contracts — working together as one unit, in an environment of trust, respect, & shared success.

Teebat Balqa
INDUSTRIAL SERVICES

Teebat Balqa for Industrial Services:
Since 2016, Our team maintained a trusted partnership with (TBI), collaborating on a range of industrial projects

HowToDo

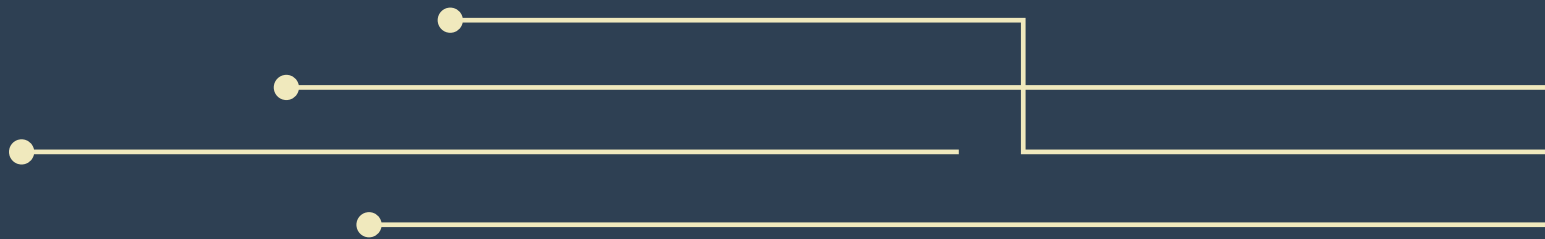

Operating in Moldova since 2022 through a locally established entity, delivering industrial services in alignment with RigZen Group's standards of safety, quality, & efficiency.

Since 2023, operations in Europe have been conducted under the entity HowToDo SRL, delivering industrial services.

Built to Deliver. Trusted to Perform.

What Makes RigZen Different

At RigZen Group, we deliver more than just access — we provide safety, speed, & technical precision in every project. Our team is trusted by our clients across Europe & the Middle East for our professionalism, adaptability, & commitment to long-term success.

Key Strengths

- **IRATA-Certified Specialists** – Fully trained rope access professionals with international credentials.
- **Efficient & Cost-Effective** – Reduced downtime & minimal disruption through rope access solutions.
- **Comprehensive Services** – From installation & inspection to rescue & demolition.
- **Proven International Experience** – Projects completed across Europe, the Middle East, & Moldova.
- **Strong Partnerships** – Trusted by clients & partners since 2016.
- **Uncompromising Safety Standards** – Zero-incident mindset with full regulatory compliance.

IRATA

IRATA International sets the global standard for industrial rope access, recognized for its unmatched safety record & rigorous technician training. With over 25 years of development, IRATA-certified methods have become the preferred access solution across oil & gas, construction, civil engineering, & environmental sectors — offering a safer, faster, & more cost-effective alternative to traditional access systems.

Whether you're managing a high-risk site or need precision access for a complex structure, RigZen Group is your reliable, safety-first partner.

Our Main Advantages

RigZen Group stands out by combining innovative access methods, dependable service, & technical excellence tailored to each project's demands. We are driven by values that ensure safety, sustainability, & long-term client satisfaction.

Safety First

We operate under a zero-incident mindset, using certified equipment & trained personnel to ensure total jobsite safety.

Ethical Behavior

Integrity & transparency guide all our decisions, from client communication to on-site operations.

Eco Friendly

We minimize environmental impact through responsible practices, low-footprint access methods, & sustainable thinking.

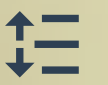

Competence

Our team consists of dual-qualified professionals with proven international experience in demanding environments.

Problem Solving

We adapt quickly & think ahead, offering smart, practical solutions for complex access & installation challenges.

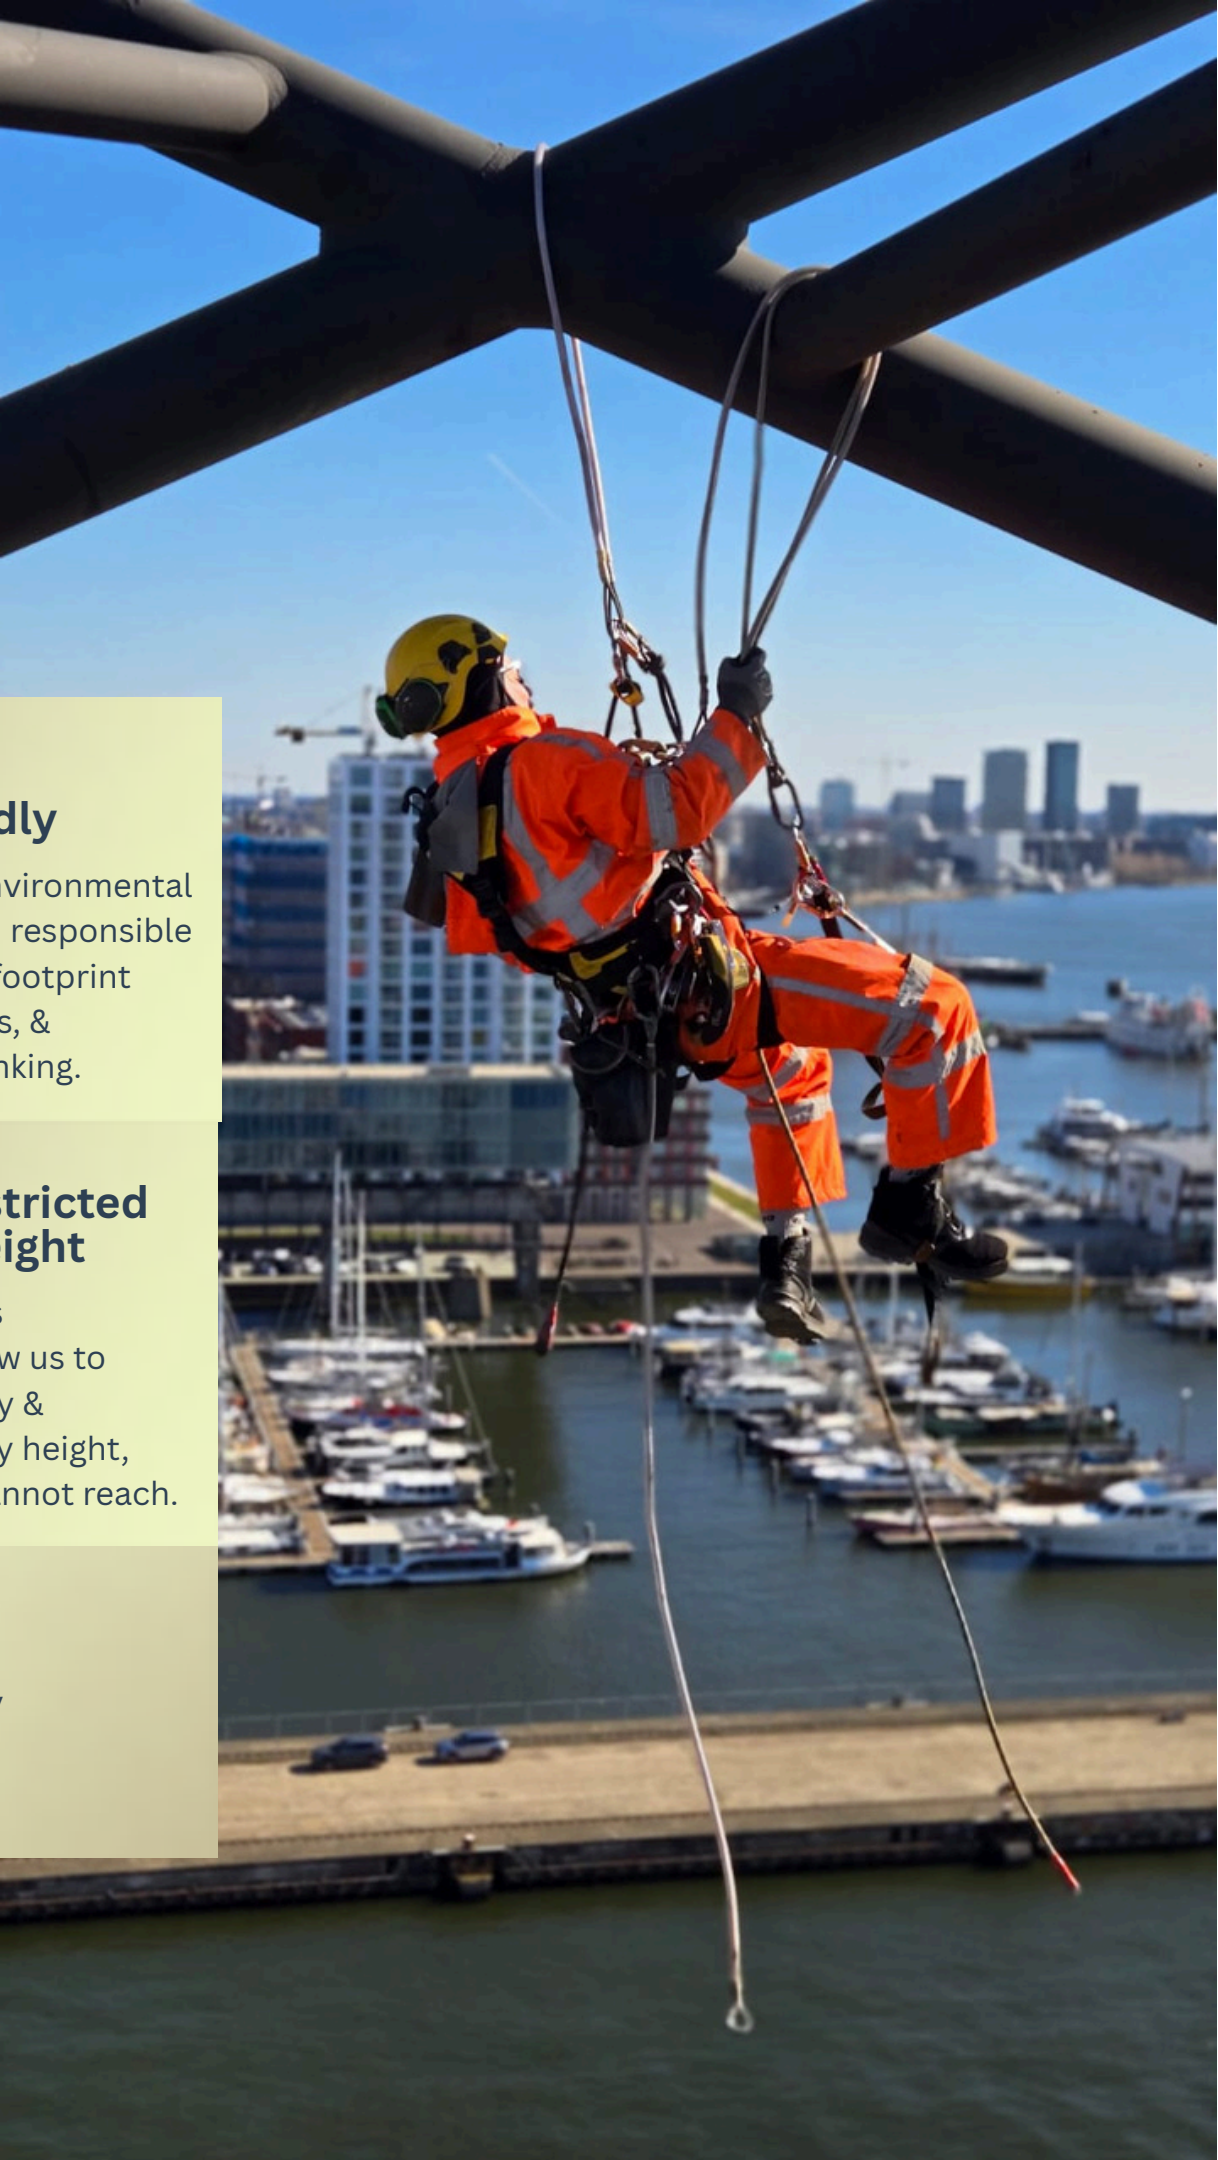

Unrestricted on Height

Our rope access capabilities allow us to work confidently & efficiently at any height, where others cannot reach.

Qualified Management

Our leadership team combines technical expertise with years of industry experience, ensuring every project is executed with precision & control.

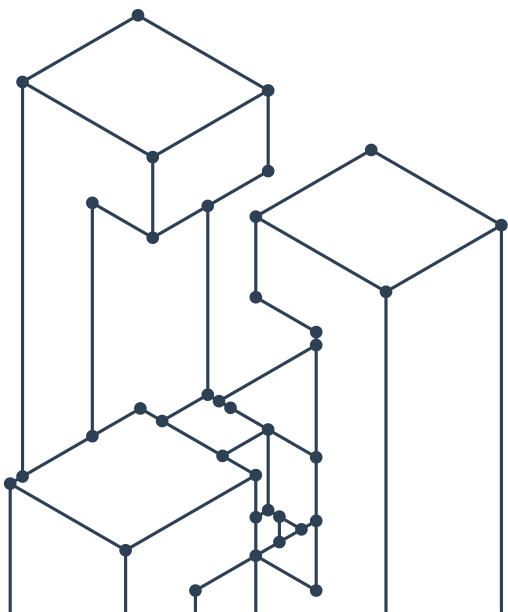

Our Team

At RigZen Group, we believe great results start with great people. Our team is made up of experienced, qualified professionals who are not only skilled at what they do but also take pride in doing it right.

We carefully choose every team member for their expertise, strong work ethic, and commitment to safety and quality. With trusted leadership and hands-on experience, we make sure every job is finished on time, within budget, and to a high standard – every time.

Facts About Us

- IRATA-certified – rope access work without scaffolding or cranes
- Fast, clean execution with respect for your property
- Flexible scheduling to avoid business disruption
- Long-term solutions, not just one-time services
- Experience with international clients

Recognized for excellence in safety performance, quality assurance, & adherence to ethical & international compliance standards.
